Linux Poker Online

Linux is an open-source operating system which works in the same way as Windows or Mac OS X. It's popular with programmers, in particular, as it can be altered and improved for a variety of uses if you have the know-how.

Linux works on all computers (and a lot of handheld devices too), but as it's not as widespread as traditional systems, most poker sites don't support it.

But despite the relative lack of support among websites offering online poker, Linux players can still find ways around it.

Linux System Requirements and Alternatives

The problem with a lot of real-money poker rooms is that they don't run special native clients in Linux, and most have no plans to make one, either. But that doesn't mean Linux users have to desert online gambling entirely.

There are certain ways around non-Linux sites. The easiest option is to download a program called WINE (look for v0.9.1 or later direct from the website: <http://winehq>).

WINE lets you run traditional Windows apps on Linux computers. It's not like a full-on Windows emulator, but it does let you play individual poker clients as and when you load them up.

No Download Options

If WINE isn't your thing, non-download poker sites can be played via your Linux web browser. Just log on with your regular Internet poker username and password, and enjoy Flash poker games via your browser.

Luckily, media players like Flash operate on Linux again after a period being discontinued for Linux systems (download version 11.2, or the latest your machine can handle).

Meanwhile, Java-operated instant-play poker clients can also be played on Linux computers.

Find the Best Linux Online Poker

While native clients for Linux poker online are hard to find in 2024, it doesn't mean users are frozen out.

At OnlinePoker, our list of top Linux poker online rooms for non-download or Windows is unrivalled on the net. It's easy to enjoy the same online poker; Linux users can also access the same, great welcome bonuses when they sign up.

Just scour our leading real-money Linux online poker reviews and pick a site that's right for you. We have the latest ratings on real money net sites with leading security, great software and the best range of poker gaming on the web.

Are There Poker Sites Just For Linux?

Unfortunately, in 2024 there are few native options for Linux poker online. But as long as you're au fait with installing programs like WINE or Java onto your Ubuntu, Fedora or Red Hat system, there's no reason you can't crush Internet poker.

For great mobile poker online, Linux operators can also enjoy Texas Hold'em and other card

games on the move via their handheld tablet or smartphone.

While poker websites are playing catch-up with offering all forms of online poker, Linux systems can still match their Windows and OSX cousins, and best of all, Linux systems rarely crash. It's great not having the worry of your PC shutting down when you're in the middle of a hand!

Rivalries. Historically, Lyon has had a healthy rivalry with Saint-tienne, head-to-head clashes between the clubs being referred to as the Derby Rhne-Alpes. Since the club's dominance at the start of the new millennium, however, they have established rivalries with Marseille, Bordeaux, Paris Saint-Germain and Lille.
