Don't be intimidated by all the betting options in Online Roulette. It's actually an easy game to learn, and all the betting options will keep it interesting and exciting, no matter how many games you play.

If you're new to the game, it's important to know the basic flow.

Make your bet. We'll go over the betting options below.

Click on the "Spin" button.

The Roulette ball, or pill, will be dropped onto the spinning wheel.

The ball will bounce around the wheel before coming to rest in one of the numbered pockets.

If the ball lands in a pocket that you bet on, you'll win. The payout will depend on your bet.

Begin the next hand by either selecting re-bet, double, or place a new bet.

The betting table is broken up into two parts, known as Inside and Outside bets.

The outside bets are logical groupings of numbers. These include betting on red or black, all the odd or even numbers, numbers 1-18 or 19-36, and dividing the numbers into thirds for a bet.

The inside bets are where you'll see all the red and black numbers that match up with what is on the wheel. There is a total of 7 inside bets, which include betting on a specific number, betting on a corner, or other specified groupings. Inside bets have lower odds - but higher payouts - than outside bets.

There are two types of Roulette wheels. The standard one is known as the Single-Zero or European Roulette wheel. This wheel will have one green zero pocket, and the '50/50' bets have a small 2.70% house edge. The Double Zero or American Roulette wheel has two green Zero pockets. This nearly doubles the house edge to 5.26%.

All Online Roulette

games at our recommended sites have a detailed help guide that will go over all the

odds, betting options, betting history, rules, and more. For more information, scroll down to the "Help" section of your chosen online casino.

The game is designed to be random, and the odds of each number or color coming up are the same on every spin. There is no strategy or pattern that can reliably predict the outcome of a roulette spin.

[roulette scrigno](#)

The wheel spin in online roulette is simulated by a Random Number Generator, or RNG. The RNG uses a number from a previously set feed of seed numbers and an algorithm to produce a number from 0-36 as randomly as possible.
