Rules of Gladiator Jackpot Slot

At the beginning of the game, you need to choose the value of the coin using the control on the left side of the interface. You can choose a value from 0.01 to 5 credits. The Bet Per Line window is used to set a bet per line – from 1 to 10 coins. The Lines key controls the number of active lines. The Bet Max key is used to increase the bet to the maximum value.

Using the Bet Per Line and the Lines

button, you can set the bet per one spin (Total Bet). The winning combinations of the same symbols should be on the adjacent reels, starting with the first one. The exception is the scatter (Colosseum), which is the winning symbol on any reel.

The

prize for a few simple symbols is the amount that is determined by the multiplication of the linear bet by the combination coefficient. You need to multiply the total bet by the combination coefficient to determine the win for the scatter. When several bonus combinations appear on the active line, the payment is made for the most expensive of them. If the scatter combination appears, the payout is added to the payouts on the lines.

Press the Spin or the Auto Start buttons to start the spinning of the reels. The Spin key activates a single spin, at the end of which the winnings will be calculated.

The prize can be increased in a risk game. The Auto Start key starts a series of automatic spins, the number of which is changed with the "" and "+" buttons.

Coefficients and Symbols of Gladiator Jackpot Slot

A wild symbol (the

gladiator's helmet) appears on the second, third, or fourth reel. It can replace any other icon that is missing to form a winning combination. Also, it is a bonus symbol.

Three helmet symbols anywhere on the second, third, or fourth reel open access to the bonus round – Gladiator Jackpot Bonus.

The scatter (Colosseum) can appear on all the reels. This combination activates the bonus round – Coliseum Bonus. The prize coefficient for 2–5 scatters is from 1 to 100 of total bets.

The symbols of the emperor and the empress bring the largest wins. From 2 to 5 empress symbols bring the prize multiplied by 7–1,000. The emperor symbols multiply the winnings by 8–5,000 of linear bets.

The remaining combinations will be winning if they are composed of three or more identical symbols on the same line. From 3 to 5 adviser symbols bring the coefficient from 25 to 350, the symbols of the knight and the man in the turban bring the coefficients from 20 to 250, the king and the ace symbols have coefficients from 15 to 200, the symbols of the lady and the jack have the coefficients from 10 to 140, and the nines and tens have the coefficients from 8 to 75.

Risk Game

The risk game is active after any win, except for the wins received when the Auto Start button was turned on and during the Gladiator Jackpot Bonus. Press the Gamble key to launch the risk game. During the game, your task is to guess the color of the inverted card. If your guess is correct, the winnings are doubled and the risk game can be continued. If your guess is wrong, the prize is lost. The maximum amount of the winnings in the risk game is 1,000 credits.

Bonus Game and Jackpot

The bonus games, Gladiator Jackpot and Coliseum Bonus, are available after a combination of three or more symbols of gladiators or Colosseum appears. Three wild symbols on the second, third, and fourth reel activate the Gladiator Jackpot Bonus. Nine gold helmets symbols will bring a jackpot. The combinations of symbols of silver and bronze helmets will bring a prize in credits. The Coliseum Bonus has several bonus levels. You can choose the desired bonus after you receive the winnings in credits. The first level determines the number of free spins (from 4 to 12), the second level determines the multiplier for payouts (from 1 to 3), and the third and fourth levels determine the additional scatter and wild symbol. The combination of three or more scatters does not activate the second round of Coliseum Bonus. However, when the emperor symbol appears on the third reel, three free spins become available.

How to Win Gladiator Jackpot Slot

The most advantageous feature of the slot is a progressive jackpot. It is available if you play for money. The round, during which the jackpot can be won, starts when a wild symbol appears on the second, third, and fourth reels during the main game. During the game, 9 helmets appear on the screen. You need to open them in turn. Each of the helmets is made of bronze, silver, or gold. You will win the jackpot if you open three identical helmets. Theoretical refund rate is 91.46%.
