Live Blackjack Rules

To play live blackjack you need to know how to play. Blackjack is a game of cards where the aim is to achieve a higher card value than the dealer without going over 21. Going over 21 is known as going 'bust'. In the case of achieving an equal hand value to the dealer the prize will be 'pushed' which means no one wins or loses and instead the wager carries over to the next game.

In live blackjack online card values are as follows:

Numbers 2 through 9: Have face value

Numbers 10, Jack, Queen, and King: Have a value of 10

Ace: Can be high or low with a value of either 1 or 11. These values are known as being hard or soft.

The dealer also has set rules they must adhere to. When all player hands have been dealt (initially 2 cards), the dealer will turn over their face down card and will draw additional cards according to the house rules. The most common house rules are as follows:

Dealer stands on all values of 17

Dealer stands on hard 17 but hits on soft 17

Achieving a value of 21 on your first two cards is known as a 'Blackjack', as long as the dealer hasn't achieved this too the player most commonly will be given a payout of 3:2.

Playing the adventure themed Gonzo's Quest slot is very simple. The game is an online video slot and is played over five reels with three rows and features 20 fixed paylines.

Prior to spinning, players need to select what Level they want to play at (1 to 5), plus the coin

value. These two numbers will be multiplied together and then multiplied again by 20 (the number of fixed paylines) to produce your bet per spin. When you are happy with this amount, just press the big green spin icon found centrally at the bottom of the game screen.

The icons will then drop from your screen (rather than the classic "spin") and will show any winning lines. If you do have a winning line, these winning icons will then drop off the reels and allow other icons to fall in their place – which effectively acts as a free spin. What's more, for every consecutive winning payline you get, the game's famous Avalanche Multiplier comes into play. Once you've pressed spin, the first winning line is at the normal x1 multiplier level, but the first lot of replacement icons will have a x2 multiplier. If these are then replaced by more winners, this will increase to a x3 multiplier, while a x5 multiplier comes into effect if you again win.

Gonzo's Quest is one of the most exciting jackpot games giving you the opportunity to discover up to 25,000 coin jackpot. Play Gonzo's Quest now!
